Admission to trading

The Outstanding Bonds are listed on Oslo Børs under the ticker LIME01. There is a requirement for a new prospectus in order for the Additional Bonds to be listed together with the Initial Bond Issue, the Additional Bonds are therefore issued under a separate ISIN ("Temporary Bonds") which, upon the approval of the prospectus, will be converted into the ISIN for the Initial Bond Issue.

What are the key risks that are specific to the securities?

Most material key risks

Credit risk is the risk that the Issuer fails to make the required payments under the Bonds (either principal or interest) pursuant to the obligations in the Bond Terms.

The occurrence of specific change of control or other put option events affecting the Issuer will permit the Bondholders to require the Issuer to redeem the Bonds, the Issuer may not be able to do so if the Issuer's access to funds at the time of the redemption is limited.

Although the Bonds are secured, there can be no assurance that the value of the Issuer's assets will be sufficient to cover all the outstanding Bonds together with accrued interest, and there can be no assurance of the value of the security.

There is no existing trading market for the Bonds, and a trading market that provides adequate liquidity may not develop.
